

## Headquarters in Crosstown Concourse

### Project Information

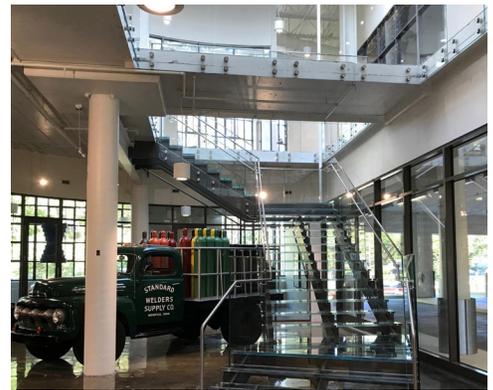

Project Name/Location:	nexAir Headquarters in Crosstown Commons - Memphis, TN
Architect:	LRK Inc.
Interior Design:	Parker Design Studio
Contractor:	Grinder, Taber & Grinder, Inc.
Glazier:	Tull Brothers
Glass Manufacturer:	Cardinal LG Co
Completion:	May 2017
Scope:	When nexAir, one of the largest distributors of atmospheric gases and welding supplies in the country, moved its corporate headquarters to a new location in Memphis, Tennessee, the company wanted an office space to match its industry-leading reputation. The company chose to work with Trex Commercial Products to create a lobby that looked as light as air. The result is a polished and modern lobby that sets the tone for the building's aesthetic appeal.

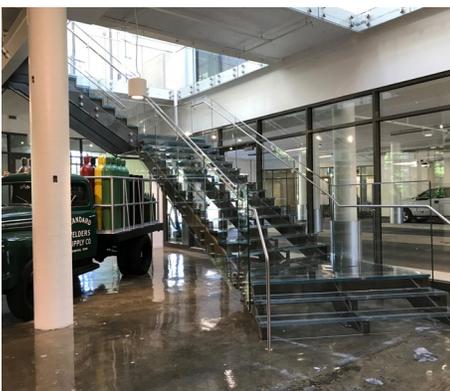

*The overlook glass was attached with a through bolt on the lower nodes and an epoxy anchor for the top.*

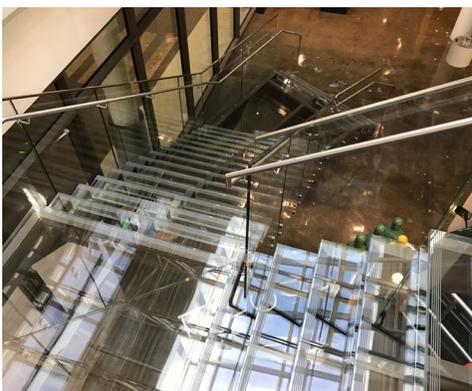

*Glass treads and risers were attached using three-inch-wide, clear VHB tape, adding to the illusion of invisibility.*

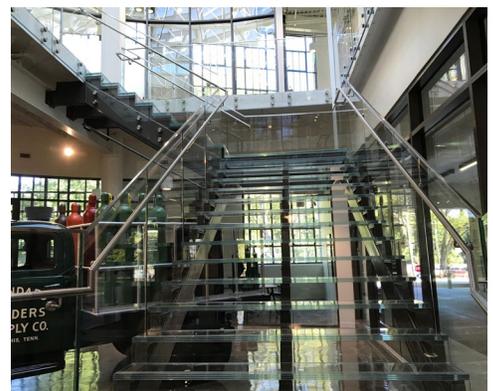

*TCP worked with the glass manufacturer and architect to come up with a tread comprised of low-iron glass with an anti-slip sandblast etch, adding functionality while maintaining the design intent.*

*A combined 186 linear feet of Trex Commercial Products' Point Series, glass treads and risers were used to create a clean, minimalist look for the building lobby.*

*Glass treads and risers, combined with the Trex Commercial Products' Point Series railing system, give this staircase a seamless, barely there appearance.*

*The client wanted the illusion of invisible treads. Working on a tight schedule, Trex Commercial Products achieved the client's vision with its Point Series railing system and glass treads, for a seamless, nearly invisible look.*
