Project Information

- Location: Broadview Heights, OH
Architect: Moody Nolan
Contractor: Ozanne Construction and levelHEADS
Glazier: United Glass & Panel Systems, Inc.
Glass Mfr.: Cardinal LG
Completion: April 2016
Scope: Trex Commercial Products' Track Rail with 1/2" tempered laminated glass panels and frosted interlayer contributed to the open interior design of this \$28 million state-of-the-art healthcare facility. The 52,000-square-foot, two-story outpatient health center includes a freestanding emergency department and urgent care center, outpatient laboratory services, physical therapy, diagnostic imaging and radiology, along with primary and specialty care physician services.

Trex Commercial Products' Track Rail with custom formed stainless steel top cap lends clean lines and subtle detailing to the modern interior.

Top mounted glass railing used on the second-floor balcony overlook enhances openness and safety.

1/2" tempered laminated glass panels with a frosted interlayer create privacy without compromising the light, airy atmosphere.
